BUSINESS REPORT

Operations of the Petrol Group

The Petrol Group operates in a competitive environment influenced by oil price fluctuations, US dollar exchange rate, global and domestic economic developments, and national laws governing the pricing of energy products. In Slovenia and Croatia, the economic situation is improving, but other SE Europe countries which also make up Petrol's sales market still face demanding economic conditions, low purchasing power and high unemployment. Although in Slovenia, where the Petrol Group sells the greater part of its petroleum products, the prices of petrol and diesel fuel at motorway and expressway service stations have been liberalised and determined by the market, the prices of petrol (less than 98 octane) and diesel fuel at other service stations remain regulated.

The Petrol Group's sales revenue for the first six months of 2019 stood at EUR 2.7 billion, a year-on-year increase of 15 percent, which was mainly the result of higher sales. Adjusted gross profit stood at EUR 231.9 million, which was 11 percent more than in the first six months of 2018. EBITDA totalled EUR 98.7 million or 25 percent more than in the first six months of 2018.

Figure 7: EBITDA broken down by activity

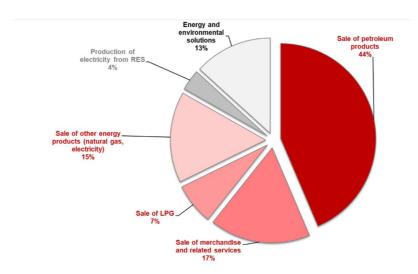

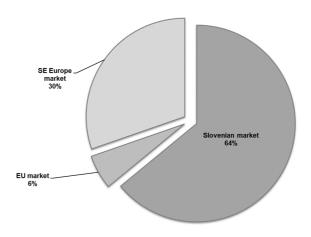

Figure 8: EBITDA broken down by market

Net profit for the first six months of 2019 totalled EUR 40.7 million and was up 4 percent year-on-year.

In the period concerned, the Petrol Group sold 1.9 million tons of petroleum products, a year-on-year increase of 17 percent. In Slovenia, the six-month sales of petroleum products stood at 846.2 thousand tons, accounting for 46 percent of the Petrol Group's total sales. In the same period, the Group sold 387.0 thousand tons of petroleum products in SEE markets, representing 21 percent of the Petrol Group's total sales, and 618.0 thousand tons in EU markets, which represented 33 percent of the Group's total sales.

At the end of June 2019, the Petrol Group's retail network consisted of 507 service stations, of which 319 were in Slovenia, 108 in Croatia, 42 in Bosnia and Herzegovina, 14 in Serbia, 13 in Montenegro and 11 in Kosovo.

In the first six months of 2019, EUR 236.7 million was generated in revenue from the sale of merchandise and related services, an increase of 4 percent compared to the same period of the previous year.

The Group sold 90.1 thousand tons of liquefied petroleum gas in the period concerned, a year-on-year increase of 17 percent.

What follows is a detailed presentation of the Petrol Group's operations in the first six months of 2019 broken down by type of activity:

- A. Sales, consisting of petroleum product sales, liquefied petroleum gas sales, natural gas sales and trading, electricity sales and trading, merchandise sales and sale of services
- B. Energy and environmental solutions, consisting of energy solutions for the public and commercial sector, energy solutions for the industry and apartment buildings, and natural gas distribution
- C. Production of renewable electricity
- D. Mobility

A. SALES

In the first six months of 2019, the Petrol Group generated EUR 2.7 billion in sales revenue.

Sales of petroleum products

In the period concerned, the Petrol Group sold 1.9 million tons of petroleum products, a year-on-year increase of 17 percent.

In <u>Slovenia</u>, 846.2 thousand tons of petroleum products were sold in the first six months of 2019, a year-on-year increase of 7 percent. Motor fuel sales (petrol and diesel fuel) were up 7 percent compared to the previous year's figures for this period.

In <u>SEE markets</u>, 387.0 thousand tons of petroleum products were sold in the first six months of 2019, a year-on-year increase of 7 percent. The most important commodities sold in SEE markets are diesel fuel and petrol.

In addition to the above, the jointly controlled entity Petrol - Oti - Slovenija L.L.C. sold 3.2 thousand tons of petroleum products.

In <u>EU markets</u>, 618.0 thousand tons of petroleum products were sold in the first six months of 2019, a year-on-year increase of 45 percent. The most important item sold in EU markets is diesel fuel.

Key impacts on operations

Fuel pricing in Slovenia

The prices of petrol and diesel fuel at motorway and expressway service stations have been liberalised and are determined by the market, while the prices of petrol and diesel fuel at other service stations remain regulated.

Until 31 March 2019, the prices of regulated motor fuels were set in accordance with the Decree on Setting Prices for Certain Petroleum Products which was in force from 1 October 2018 onwards. On 28 March 2019, the Government of the Republic of Slovenia adopted a new Decree on Setting Prices for Certain Petroleum Products, which shall remain in force until 30 September 2019. The pricing methods under each of the decrees remained unchanged compared to their preceding decrees.

The model-based margin is still government-regulated and stands at EUR 0.08701 per litre of NMB-95 petrol and EUR 0.08158 per litre of diesel fuel.

Since 9 April 2016, the prices of the 98-octane and higher-octane petrol and of extra light heating oil have been liberalised and determined by the market.

Slovenia's gross margins for petroleum products, which are, under the model, set at a fixed amount and do not reflect changes in retail prices, are still below European average. In the case of petrol, they amounted to 69 percent of the average gross margin in the EU countries (61 percent if the compulsory stocks membership fee is not taken into account) and in the case

of diesel fuel to 55 percent (49 percent if the compulsory stocks membership fee is not taken into account) (own calculations based on Platt's and Oil Bulletin data).

Fuel pricing in Croatia

Since 20 February 2014, when the Oil and Petroleum Products Market Act entered into force and fully liberalised the pricing of petroleum products, the prices of petroleum products in Croatia have been set freely and determined by the market.

Fuel pricing in Bosnia and Herzegovina

In Bosnia and Herzegovina, the prices of petroleum products are not government-regulated. They are set freely and are determined by the market, and can change on a daily basis. Due to the free setting of prices, retail fuel prices vary according to the location of a service station.

Fuel pricing in Serbia

Since the legislation liberalising Serbia's oil market (unregulated imports of oil and petroleum products) entered into force on 1 January 2011, the prices of petroleum products have no longer been government-regulated and are set freely and determined by the market.

Fuel pricing in Montenegro

In Montenegro, the prices of petroleum products are set in accordance with the Regulation on the Method of Setting Maximum Retail Prices, which has been in force since 1 January 2011. The prices change fortnightly, provided that prices on the oil market (Platts European Marketscan) and the exchange rates of the euro and the US dollar change by more than 5 percent. In addition to market oil prices and changes in the exchange rates of the euro and the US dollar, the methodology used to calculate selling prices takes into account taxes, the costs of transhipment, handling, bank charges, storage, transport and distribution, as well as (excise) duties and an oil companies' gross margin. The latter amounts to EUR 0.063 per litre of petrol, EUR 0.064 per litre of eurodiesel and EUR 0,076 per litre of extra light heating oil. In addition to these gross margins, liquid fuel traders may factor in all of the above costs at EUR 0.05 per litre of petrol, EUR 0.05 per litre of eurodiesel and EUR 0.026 per litre of extra light heating oil.

Fuel pricing in Kosovo

In Kosovo, retail and wholesale prices of petroleum products are not government-regulated. Only in the case of sales of petroleum products to government institutions and state-owned companies are prices set in accordance with a prescribed methodology, which takes into account average monthly market prices, changes in the exchange rate of the euro and the US dollar, logistics costs and a maximum margin. These prices represent an unofficial basis for retail prices, which change according to market-based fuel prices.

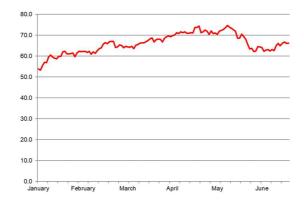

Changes in oil and petroleum product prices in the world market

The average price of Brent Dated North Sea crude oil stood at USD 66.0 per barrel in the first six months of 2019 and was down 7 percent year-on-year. The average price in euros was in line with the average for the same period of the previous year. In the period concerned, the

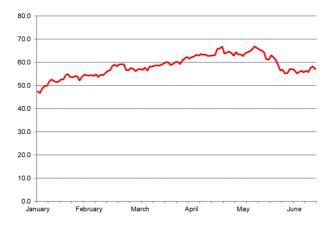

price of Brent crude peaked on 16 May 2019, reaching USD 74.7 per barrel. Its lowest price was recorded on 3 January 2019 at USD 53.2 per barrel. The prices of petrol and middle distillates followed the same trends as crude oil prices.

Figure 9: Changes in Brent Dated High oil price in the first six months of 2019 in USD/barrel

SOURCE: Petrol, 2019

Figure 10: Changes in Brent Dated High oil price in the first six months of 2019 in EUR/barrel

SOURCE: Petrol, 2019

OPEC's decision to limit oil output in cooperation with Russia caused the price of oil to rise in 2019 compared to the end of 2018. Future oil price movements will continue to depend largely on OPEC's oil output agreements, the situation in the Middle East, relations between Iran and the United States, and also on economic growth expectations, US and EU oil stocks figures and demand in China.

Changes in the US dollar to the euro exchange rate

The US dollar to the euro exchange rate ranged between 1.11 and 1.15 US dollars per euro in the first six months of 2019. The average exchange rate of the US dollar according to the exchange rate of the European Central Bank stood at 1.13 US dollars per euro in the period concerned.

Sales of merchandise and related services

Merchandise sales consist of sales of automotive products, foodstuffs, accessories, tobacco and lottery products, coupons and cards, coffee-to-go and other merchandise. The Petrol Group generated EUR 236.7 million in revenue from the sale of merchandise and related services¹ in the first six months of 2019, an increase of 4 percent compared to the same period of the previous year.

<u>In Slovenia</u>, EUR 200.6 million was generated in revenue from the sale of merchandise and related services in the first six months of 2019, an increase of 2 percent compared to the same period of the previous year. The range at Petrol's points of sale is modified and expanded as we try to accommodate the needs of our service station customers by quickly adapting the range.

<u>In SE Europe markets</u>, EUR 36.0 million was generated in revenue from the sale of merchandise in the first six months of 2019, an increase of 15 percent compared to the same period of the previous year. The best results were achieved in tobacco and food sales.

Sales of services

Services consist of revenue from storage and petroleum-product handling services, renting of business premises and hospitality facilities, transport, carwash services, revenue from Petrol Club cards, and other services. In the first six months of 2019, the Petrol Group generated EUR 18.0 million in revenue from the services related to oil and merchandise sales.

Sales of liquefied petroleum gas

In the first six months of 2019, the Petrol Group sold 90.1 thousand tons of liquefied petroleum gas, a year-on-year increase of 17 percent.

At the end of June 2019, the Petrol Group operated 5 LPG supply concessions in Slovenia. In addition, the company Petrol d.o.o. has LPG supply contracts in the towns of Šibenik and Rijeka. Liquefied petroleum gas is supplied to customers also through LPG storage tanks and at service stations as autogas.

Natural gas sales and trading

In the first six months of 2019, the Petrol Group sold 10.0 TWh of natural gas or 10 percent less than in the same period of the previous year. Of this quantity, 7.3 TWh were sold to end users and 2.7 TWh as part of trading.

Electricity sales and trading

The Petrol Group has positioned itself as an important electricity market player. It set up a complete infrastructure for wholesale electricity trading in Slovenia, EU countries and SEE

-

¹In accordance with the new accounting standard IFRS 15, the Petrol Group changed the method of presenting revenue from the sale of goods sold by the Group on behalf of third parties. Under the new standard, only the fee that the Group is entitled to receive in return for the sale of goods on behalf of third parties is presented in sales revenue.

countries. Electricity sales to end users (businesses and households) already in place in Slovenia are now being expanded to SE Europe.

In the first six months of 2019, the Petrol Group sold 12.3 TWh of electricity, a year-on-year increase of 41 percent.

B. ENERGY AND ENVIRONMENTAL SOLUTIONS

In the first six months of 2019, the Petrol Group generated EUR 33.6 million in revenue from the sale of energy and environmental solutions.

Energy and environmental solutions consist of an energy range offered in the following segments:

- energy solutions for the public and commercial sector (systems of energy and environmental management of buildings in the public and commercial sector, district heating and district energy systems, water supply systems, efficient lighting systems),
- energy solutions for the industry and apartment buildings,
- natural gas distribution.

Long-term contract-based supply of energy and contractually guaranteed energy and water savings (performance contracting) are the most common project implementation models in the public sector, the commercial sector and in industry. These models offer a significant advantage to the customers in that Petrol assumes all technical and economic risks of project implementation and management, provides the necessary funds to carry out the measures, and supplies customers with the required energy of suitable quality, guaranteeing savings in the use of energy products compared to the previous situation.

The projects of long-term heat supply, energy renovation of buildings and the reduction of electricity consumption and water losses are largely carried out using the public-private partnership model.

In the first six months of 2019, the Petrol Group sold 92.5 thousand MWh of heat, a year-on-year increase of 9 percent.

In the field of industry, we have been developing various business models tailored to the needs of the customer and the customer's technological processes. Our experts prepare solutions for steam and heat, natural gas, industrial gases and compressed air, water, cooling systems and industrial waste treatment plants. We are setting up projects in the field of efficient lighting in industrial buildings. Industrial customers are included in our virtual power plant.

In addition to industrial users, we are developing solutions for commonhold unit owners and managers in the field of energy-saving renovation, control and management of boiler rooms and the installation of heat cost allocators in apartment buildings.

At the end of June 2019, the Group operated 29 natural gas supply concessions in Slovenia. In Serbia, it supplied natural gas to the municipalities of Bačka Topola and Pećinci as well as to three Belgrade municipalities. At the end of 2018, the Petrol Group also established itself in Croatia where its company Zagorski metalac d.o.o. distributes natural gas in certain municipalities of the Zagorje-Krapina County and the Zagreb County.

In the first six months of 2019, the Petrol Group distributed 597.1 thousand MWh of natural gas.

C. PRODUCTION OF RENEWABLE ELECTRICITY

In the first six months of 2019, the Petrol Group generated EUR 4.5 million in sales revenue in the area of renewable electricity production.

Rapid development of the global energy system is fuelled by growing energy needs as well as by environmental requirements linked to climate change. Recognising this, we also produce electricity from renewable sources — wind, water and sun, with wind power becoming increasingly important in the European energy market.

As a key element in the future development of the Petrol Group, renewable electricity production has a strategic place in Petrol's decision to become a modern energy company. It helps us secure own long-term sources for the purpose of selling electricity, while keeping us prepared for new trends in the area of transport. At Petrol, we see enormous potential for the development of renewable electricity production in SE Europe. By developing our own production capacity, we pursue the strategic orientation of becoming a visible regional provider of comprehensive energy and environmental solutions, and a partner in the development of the circular economy for transition to the low carbon society.

The Petrol Group has been involved in electricity production since 2003, when electricity was produced at smaller production plants (photovoltaics, micro cogeneration, biogas plants).

We produce hydroelectric power in Bosnia and Herzegovina, where electricity is produced at four small hydroelectric plants on rivers Jezernica and Kozica. In 2018 we launched electricity production at the small hydroelectric power plant Jeleč (4.9 MW of output, 15 thousand MWh of annual production).

In Croatia, we started producing wind electricity at Glunča power plant in the Šibenik area in 2017 (20.7 MW of rated output, 50 thousand MWh of annual production).

D. MOBILITY

Mobility is comprised of two segments:

- E-mobility setting up, managing and maintaining infrastructure for the charging of electric vehicles, and provision of the charging service,
- Mobility services "vehicle as a service" and new types of mobility such as car sharing, transport on demand and more dynamic forms of alternative transport, aggregation and optimisation of passenger transport.

As part of e-mobility, we provide services related to the setting up, management and maintenance of infrastructure for the charging of electric vehicles as well as services linked to the very performance and billing of the charging service, and also customer care. These services and solutions are offered also to companies and municipalities. At the end of June 2019, we managed and provided the charging service at more than 120 charging points in

Slovenia and Croatia. In the first six months, over 180 MWh of electricity were delivered at the charging points. Considering publicly available records on the number of registered electric vehicles on Slovene roads, more than 80 percent of EV users used Petrol payment cards to charge their vehicles. In 2018 we began to actively expand the network of charging points for electric vehicles also in Croatia, a process that continued in the first half of 2019.

In the area of mobility services, we develop services related to new concepts and types of mobility such as "vehicle as a service", car sharing and dynamic forms of alternative transport to complement existing regular scheduled bus transport and other services. The "vehicle as a service" business model, which we already offer commercially, consists of providing to the customer all services related to the use of a vehicle and fleet management in return for a fixed monthly fee. We have conducted several successful marketing campaigns thanks to which we were able to increase the fleet of electric vehicles that we lease out.

To develop services, we join forces with domestic and foreign partners. In 2019 we were involved in three international projects for which we also obtained EU grants.

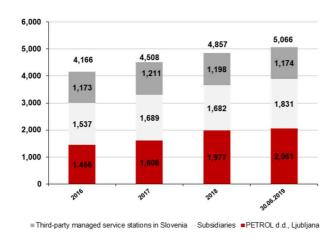

Sustainable development

Sustainability principles have a prominent place in the Petrol Group's development strategy. Our aim is to do business in such a way that it positively affects the economic and social fabric, while striving to protect the environment. In June 2019 we published a fourth Sustainability Report of the Petrol Group².

Employees

On 30 June 2019, the Petrol Group had 5,066 employees, of which 34 percent worked for subsidiary companies abroad. As the Group expanded its business, the number of employees increased by 209 compared to the end of 2018.

Figure 11: Changes in the number of employees of the Petrol Group and at third-party managed service stations in the period 2016 – 2019

² https://www.petrol.eu/binaries/content/assets/skupina-petrol-eng/2019/publications/tp-2018_eng.pdf

Employee structure

At the end of June 2019, the average age of the Petrol Group employees was 39 years. 59 percent of employees were male and 41 percent female.

The educational structure of the Petrol Group has been improving over the years. This is a result of employee training on the one hand and HR policy on the other. Newly hired employees with higher education thus improve the educational structure, while at the same time employees with lower education leave the company. The Petrol Group has a keen interest in training its employees, as knowledge represents one of Petrol's key competitive advantages.

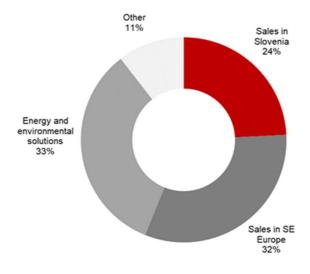

Training

In the first six months of 2019, the Petrol Group provided close to 72 thousand teaching hours of training, which represented, on average, 15 teaching hours of training per employee in the period concerned. Organised as part of the Petrol Group is Petrol Academy. Its main goal is to provide training to all employees in a systematic and comprehensive manner. The Group carried out technical and legally required training in the period under review.

Investments

In the first six months of 2019, net investments³ in property, plant and equipment, intangible assets and long-term investments stood at EUR 30.9 million. Out of the above amount, 24 percent was allocated to sales in Slovenia, 32 percent to sales in SE Europe, 33 percent to energy and environmental solutions, and 11 percent to the upgrading of information and other infrastructure.

Figure 12: Breakdown of the Petrol Group's investments in the first six months of 2019

_

³Net investments in fixed assets = Investments in fixed assets - Disposal of non-current assets.

The quality management system

The Petrol Group's operations are based on the implementation of strict quality standards. Since 1997, we have been constantly upgrading and expanding the Group's quality management system. In addition to the certified quality management system, environmental management system and energy management system, the comprehensive quality management system incorporates the requirements of the HACCP food safety management system, of the OHSAS occupational health and safety system and of the ISO 27001 information security system.

Petrol Geo d.o.o.	ISO 9001: 2015	/	/	/	/
Beogas d.o.o.	ISO 9001: 2015	/	/	/	/
Petrol d.o.o., Beograd	ISO 9001: 2008	ISO 14001: 2004	/	/	OHSAS 18001

^{*}Based on the Report on the implementation of the Responsible Care Global Charter commitments, Petrol d.d., Ljubljana became a holder of a Responsible Care Certificate for its activities relating to storage, logistics and retail network of service stations in Slovenia and granted the right to use the initiative's logo.

In January 2019, a first recertification audit of the ISO 50001 energy management system was conducted at Petrol d.d., Ljubljana, which revealed that the system is suitably maintained and compliant with the standard's requirements. The ISO 50001 certificate was then renewed for three years. In April 2019, an integrated surveillance audit of the quality management system and of the environmental management system (ISO 9001 and 14001) was performed at Petrol d.d., Ljubljana.

At the company Petrol d.o.o., Beograd, an ISO 9001, ISO 14001 and ISO 18001 certification audit was conducted in respect of the process Sale of Industrial Equipment, Engineering and Project Management. At the company Beogas d.o.o., a recertification audit of the (ISO 9001) quality management system took place. In May 2019, a surveillance audit of the quality and environmental management systems took place at the company Petrol d.o.o., Zagreb. The audits were passed successfully and did not identify any non-compliance issues.

^{**}Petrol d.d., Ljubljana is a holder of an FSC certificate for the production of wood chips used for heat generation. The FSC certificate, which is issued by an international NGO called the Forest Stewardship Council, promotes environmentally appropriate, socially beneficial and economically viable management of forests.

^{***}The AEO certificate is issued by the Customs Administration of the Republic of Slovenia which also carries out control and inspects AEO certificate holders. The certificate allows for easier admittance to customs simplifications, fewer physical and document-based controls, priority treatment in case of control, a possibility to request a specific place for such controls and a possibility of prior notification. To obtain an AEO certificate, several conditions and criteria need to be met: compliance with security and safety standards, appropriate records to demonstrate compliance with customs requirements, a reliable system of keeping commercial and transport records for control purposes, and proof of financial solvency.

^{****}Certificate to carry out an in-house inspection service for the performance of pressure receptacle inspections in accordance with Directive 2010/35/EU. Petrol d.o.o. is an IS body under the authority of the notified body Bureau Veritas Italia for the purpose of carrying out periodic inspections of pressure receptacles defined in accordance with chapter 6.2 of ADR/RID/ADN.

Social responsibility

Caring for social and environmental issues has been part of the Petrol's operations for a number of years. The demands and challenges of our time are addressed based on a long-term growth strategy and a strong awareness that supporting the environment in which we operate significantly affects our operations and development. For many years we have been helping wider social and local communities achieve a dynamic lifestyle and better quality of life. Our responsible social attitude is demonstrated through the support we provide to a number of sports, arts, humanitarian and environmental projects. In the Petrol Group, social responsibility is perceived as a lasting commitment to work together with the environment in which we operate.

Risk management

The Petrol Group manages risks using a comprehensive risk management system, making sure that the Company's key risks are identified, assessed, managed, utilised and monitored. In doing that, we aim to develop a risk-awareness culture to ensure better control over the risks and better information for decision-making at all levels of the Group's operation. Risk management concerns each Petrol Group employee who is, as a result of their decisions and actions, exposed to risks on a daily basis while carrying out their work assignments and responsibilities.

Petrol's risk model comprises 20 risk categories that are divided into two groups:

- Environment risks and
- Performance risks.

According to the results of the 2017 risk assessment, the most relevant and probable risks comprise the following financial risks: price and volumetric risk, foreign exchange risk, credit risk and liquidity risk.

In addition to the main financial risks, the most relevant and probable risks include legislation and regulation risks, information system risks, business decision-making risks, interest rate risks and information risks.

Price and volumetric risk and foreign exchange risk

The Petrol Group's business model includes energy products, such as petroleum products, natural gas, electricity and liquefied petroleum gas, exposing the Petrol Group to price and volumetric risks and to foreign exchange risks arising from the purchase and sale of these products.

The Petrol Group purchases petroleum products under international market conditions, pays for them mostly in US dollars and sells them in local currencies. Because the global oil market and the US dollar market constitute two of the most volatile global markets, the Petrol Group is exposed to both the price risk (changes in the prices of petroleum products) and the foreign exchange risk (changes in the EUR/USD exchange rate) while pursuing its core line of business. The Petrol Group manages volumetric and price risks to the largest extent possible by matching suppliers' terms of procurement with the terms of sale applying to customers. Any

remaining open price or foreign exchange positions are closed through the use of financial instruments, in particular commodity swaps in the case of price risks and forward contracts in the case of foreign exchange risks.

Trading in energy products exposes the Group to price and volumetric risks. These are managed with an assortment of limits systems defined depending on the business partner, the area of trading and the value at risk, and with appropriate processes in place to monitor and control these risks.

In addition to the risks arising from changes in the EUR/USD exchange rate, the Petrol Group is exposed, to some degree, also to the risk of changes in other currencies, which is linked to doing business in the region. The Group monitors open foreign exchange positions and decides how to manage them on a monthly basis.

Transactions with derivatives are entered into only to hedge against price and volumetric risks and foreign exchange risks rather than for reasons of speculative nature.

Credit risk

The credit risk was assessed in 2017 as the third most relevant financial risk to which the Petrol Group was exposed in connection with the sale of goods and services to natural and legal entities. The risk is managed using the measures outlined below.

The operating receivables management system provides us with an efficient credit risk management. Changes and updates to the risk management system undertaken in the past three years were further advanced in 2019 as a new information system was introduced. The new system has already been deployed within the parent company, with other Group companies following as scheduled.

In conjunction with the introduction of the new information system, the system of limits for operations involving natural persons was updated as previously announced.

As part of the usual receivables management processes, we keep actively pursuing the collection of receivables. Particular attention is given to individual treatment of major customers or customers in relation to which outstanding receivables balances exceed EUR 250,000. We refine procedures for approving the amount of exposure (limits) to individual buyers and expand the range of first-class credit insurance instruments as a requirement to approve sales (receivables insurance with credit insurance companies, bank guarantees, letters of credit, collaterals, corporate guarantees, securities, mortgages, pledges). A great deal of work is put into the management of receivables from large customers in Slovenia, and significant attention is also devoted to the collection of receivables in SE Europe markets, where the solvency and payment discipline of the business sector differs from that in Slovenia. Receivables are systematically monitored by age, region and organisational unit as well as by quality and individual customer. The exposure of customers in the Petrol Group's portfolio to the credit risk is monitored at a global level. To monitor receivables, we use a joint receivables management application, which provides us with automated control over the exposure to individual customers and the possibility to respond immediately. Through experience, the application is continuously improved. In addition, we introduced centralised control over credit insurance instruments received and centralised the collection process.

We consider that credit risks are adequately managed within the Petrol Group. Our assessment is based on the nature of our products, our market share, our large customer base, the vast range of credit insurance instruments and a higher volume of secured receivables. The Petrol Group too, however, is unable to fully avoid the consequences of bankruptcies, compulsory composition proceedings and personal bankruptcies.

Liquidity risk

The Petrol Group has been assigned a BBB- long-term international credit rating, an A-3 short-term credit rating and a stable credit rating outlook by Standard & Poor's Ratings Services, which reaffirmed the ratings on 11 April 2018. This investment-grade rating enables us to tap international financial markets more easily and represents an additional commitment towards successful operations and the deleveraging of the Petrol Group. We are currently introducing relevant S&P's methodology into the management of liquidity risks.

At the end of June, we repaid all obligations under the eurobonds, in total EUR 203 million.

In the first six months of 2019, average petroleum product prices were somewhat lower year-on-year, meaning that slightly less working capital might be needed. The Group's long-term and short-term lines of credit provide us with a high level of liquidity.

Cash flow management nevertheless requires considerable attention and prudence, especially as regards the planning of cash inflows from lay away sales, this being the main source of credit risks and, consequently, liquidity risks.

The Petrol Group is capable of meeting all of its outstanding liabilities at any given moment. The Group's successful operations in particular are a guarantee for the Group's long-term solvency and boost its equity capital.

Interest rate risk

The Petrol Group regularly monitors its exposure to the interest rate risk. 88.3 percent of the Group's non-current financial liabilities contain a variable interest rate that is linked to EURIBOR. In the first six months of 2019, the average EURIBOR rate was comparable to the one at the end of 2018 and thus remains historically low (negative).

To hedge against exposure to the interest rate risk, a portion of variable interest rates is transformed into a fixed interest rate using derivative financial instruments, thus protecting our net interest position. When deciding whether to pursue additional hedging activities, forecasts regarding interest rate changes are considered. The time of hedging and the type of instruments used to this effect are determined based on market conditions. In the first six months of 2019, no additional interest rate hedging contracts were concluded.

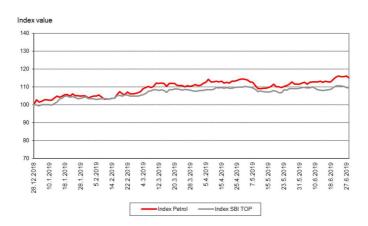

Petrol's shares

At the end of June 2019, share prices at the Ljubljana Stock Exchange were on average higher than at the end of 2018. This was also reflected in the SBITOP, the Slovene blue-chip index, which is used as a benchmark and provides information on changes in the prices of the most

important and liquid shares traded on the regulated market. The index also comprises Petrol's shares. The SBITOP stood at 881.59 as at the end of June 2019 and was up 9.5 percent relative to the end of 2018 (805.06). During this period, Petrol's shares gained 15.2 percent in value. In terms of trading volume, which in the case of Petrol's shares amounted to EUR 11.3 million between January and June, the shares were ranked fourth among the shares traded on the Ljubljana Stock Exchange. In terms of market capitalisation, which stood at EUR 744.8 million as at 30 June 2019, the shares were ranked third and accounted for 11.0 percent of the total Slovene stock market capitalisation on the said date.

Figure 13: Base index changes for Petrol d.d., Ljubljana's closing share price and the SBITOP index in the first six months of 2019 compared to the end of 2018

In the first six months of 2019, the price of Petrol's shares ranged between EUR 315 and EUR 360 per share. Their average price for the period stood at EUR 339.64 and their price as at the end of June 2019 at EUR 357.00. The Petrol Group's earnings per share stood at EUR 19.78, with its book value per share amounting to EUR 357.82. Petrol d.d., Ljubljana had 23,260 shareholders as at 30 June 2019. At the end of June 2019, 553,173 shares or 26.5 percent of all shares were held by foreign legal or natural persons. Compared to the end of 2018, the number of foreign shareholders increased by 0.2 percentage points.

Contingent increase in share capital

In the period up to 30 June 2019, the General Meeting of Petrol d.d., Ljubljana did not adopt any resolutions regarding the contingent increase in share capital.

Dividends

In accordance with a resolution of the 29th General Meeting held on 18 April 2019, Petrol d.d., Ljubljana paid 2018 gross dividends of EUR 18.00 per share in August 2019. The gross dividend per share for 2017, which was paid in 2018, stood at EUR 16.00.

Own shares

Petrol d.d., Ljubljana did not repurchase its own shares in the first six months of 2019. As at 30 June 2019, there were 30,723 own shares, representing 1.5 percent of its registered share capital. This includes 24,703 own shares that were acquired by Petrol d.d., Ljubljana in the period 1997 to 1999. Their total cost equalled EUR 2.6 million as at 30 June 2019 and was EUR 6.2 million lower than their market value on that date. The remaining 6,020 shares are the shares that are considered as own shares which were held by the subsidiary Geoplin d.o.o. Ljubljana at the time it was incorporated in the Petrol Group.

Own shares of Petrol d.d., Ljubljana, in total 36,142 (without the shares of Geoplin d.o.o. Ljubljana), were purchased between 1997 and 1999. The Company may acquire these own

shares only for the purposes laid down in Article 247 of the Companies Act (ZGD-1) and as remuneration to the Management Board and the Supervisory Board. Own shares are used in accordance with the Company's Articles of Association.

In accordance with a resolution of the 27th General Meeting held on 10 April 2017, the Company's Management Board is authorised to acquire own shares within 36 months of the adoption of the resolution. Under this authorisation, a maximum of 208,630 own shares may be acquired, but the total percentage of the shares acquired based on this authorisation may not exceed, together with other own shares already held by the Company (24,703 own shares plus 6,020 own shares of Geoplin d.o.o. Ljubljana, in total 30,723 own shares), 10 percent of the Company's share capital (208,630 shares). In 2018 and 2019, Petrol d.d., Ljubljana did not adopt a programme to prepare a policy for creating own shares.

Regular participation at investors' conferences and external communication

Petrol d.d., Ljubljana has set up a programme of regular cooperation with domestic and foreign investors, which consists of public announcements, individual meetings and presentations, and public presentations. We regularly attend investors' conferences that are organised each year by stock exchanges, banks and brokerage companies. There were several individual meetings with investors and analysts in the first six months of 2019. In March, we participated in a Ljubljana Stock Exchange webcast. In April, we attended an investors' conference organised by the Ljubljana Stock Exchange and the Zagreb Stock Exchange in New York as well as an investor roadshow in London organised by Zagreb-based InterCapital and the London Stock Exchange. In May, we attended a joint investors' conference in Zagreb, which was organised by Ljubljana and Zagreb Stock Exchanges.

Credit rating

On 11 April 2018, Standard & Poor's Ratings Services affirmed Petrol d.d., Ljubljana's "BBB-" long-term credit rating, its "A-3" short-term credit rating and its "stable" credit rating outlook.

General Meeting resolutions

At the 29th General Meeting of Petrol d.d., Ljubljana held on 18 April 2019, the following resolutions were adopted:

- Accumulated profit of EUR 49,769,123 as at 31 December 2018 shall be used as follows:
 - accumulated profit of EUR 37,553,418 shall be distributed as dividend payments, with gross dividends amounting to EUR 18.00 per share (taking into account the total number of shares issued, i.e. without excluding own shares);
 - the remaining accumulated profit of EUR 12,215,705 and any amounts linked to own shares arising on the date the dividends are paid and amounts resulting from rounding off dividend payments shall be transferred to other revenue reserves.

The Company shall pay out dividends on 9 August 2019 to shareholders registered with KDD – the Central Securities Clearing Corporation on 8 August 2019.

- The Company's Management Board shall be granted discharge from liability for the year 2018.
- The Company's Supervisory Board shall be granted discharge from liability for the year 2018.
- The audit firm ERNST & YOUNG Revizija, poslovno svetovanje, d.o.o., Dunajska cesta 111, Ljubljana, shall be appointed auditor of the Company for 2019, 2020 and 2021.
- The Company's Articles of Association shall be amended as follows:
 - owing to changes introduced as regards the Company's activities, the following shall be added to Clause 03.01. of the Articles of Association:
 - 08.120 Operation of gravel and sand pits, mining of clays and kaolin
 - 08.910 Mining of chemical and fertiliser minerals
 - 08.930 Extraction of salt
 - 08.990 Other mining and quarrying n.e.c.
 - 09.900 Support activities for other mining and quarrying
 - 49.310 Urban and suburban passenger land transport
 - 49.320 Taxi operation
 - 49.391 Interurban and other road passenger transport;
 - due to the expiry of a five-year period, the provisions pertaining to the authorised capital
 of the Company shall be deleted, namely the title 07A.00. AUTHORISED CAPITAL and
 Clauses 07A.01., 07A.02. and 07A.03;
 - o the provisions of Clause 09.04. shall be extended by adding a new sentence at the end of the Clause, reading as follows: "A member of the Management Board shall hold at least a bachelor's or master's degree from a relevant university (Bologna 2nd Cycle Degree), and shall have five years of appropriate work experience in managerial positions and suitable knowledge and organisational skills to manage the company. Further, the member shall demonstrate professional and personal integrity."
 - a new second paragraph shall be added to Clause 10.13., which reads as follows: "A member of the Supervisory Board may resign from the position of Member of the Supervisory Board prior to the expiry of the term of office for which he/she has been appointed. However, the resignation shall not be given at an inappropriate time, and is subject to a 90 days' notice period. In the case the resignation is given at an inappropriate time, the member of the Supervisory Board shall be liable to the company for any damage caused to it, despite the fact that the 90 days' notice period has been observed."
 - Clause 10.14. shall be amended to read: "In return for their work, the members of the Supervisory Board shall be entitled to receive basic remuneration for duties performed, attendance fees and reimbursement of costs in connection with their work for the Supervisory Board. The exact amounts of payments shall be determined in a resolution adopted by the General Meeting."
 - Clause 10.15. shall be deleted; the previous Clause 10.16. shall be renumbered to 10.15.
- The following remuneration is set by the General Meeting for the members of the Supervisory Board in return for their work:
 - The members of the Supervisory Board shall be entitled to receive attendance fees for their attendance at Supervisory Board's meetings. Each member shall receive a gross amount of EUR 275.00 for each meeting attended. The members of a Supervisory Board Committee shall be entitled to receive attendance fees for their

attendance at Committee meetings. Each member of the Committee shall receive 80 percent of the fee for attendance at the Supervisory Board's meetings. The fee for attendance at a correspondence meeting amounts to 80 percent of the regular attendance fee. Notwithstanding the foregoing and the number of their attendances at meetings, in each financial year a member of the Supervisory Board shall be entitled to receive the total amount of attendance fees not exceeding 50 percent of the basic remuneration paid on an annual basis for performing the duties of Member of the Supervisory Board. In each financial year, a member of the Supervisory Board who is also a member of a Supervisory Board Committee or Committees shall be entitled to receive, notwithstanding the foregoing and the number of their attendances at the meetings of the Supervisory Board and of the Committees, the total amount of attendance fees not exceeding 75 percent of the basic remuneration paid on an annual basis for performing the duties of Member of the Supervisory Board.

- 2. In addition to attendance fees, the members of the Supervisory Board shall be entitled to receive basic remuneration for performing their duties; each member shall be entitled to receive a gross annual amount of EUR 14,000.00. Further, the President of the Supervisory Board shall also be entitled to receive an additional amount of 50 percent of the basic remuneration paid for performing the duties of Member of the Supervisory Board. The Vice President / Deputy President of the Supervisory Board shall be entitled to receive an additional amount of 10 percent of the basic remuneration paid for performing the duties of Member of the Supervisory Board. The members of a Supervisory Board Committee shall be entitled to receive an additional amount for performing their duties; each member of the Committee shall receive 25 percent of the basic remuneration paid for performing the duties of Member of the Supervisory Board. The president of a Committee shall be entitled to receive an additional amount of 37.5 percent of the basic remuneration paid for performing the duties of Member of the Supervisory Board. In each financial year, a member of a Supervisory Board Committee shall be entitled to receive, notwithstanding the foregoing and the number of committees of which they are a member or president, the total amount of additional fees not exceeding 50 percent of the basic remuneration paid on an annual basis for performing the duties of Member of the Supervisory Board. If the term of office of a member of the Supervisory Board is shorter than the financial year, the member of a Supervisory Board Committee shall be entitled to receive, notwithstanding the foregoing and the number of committees of which they are a member or president, the total amount of additional payments not exceeding 50 percent of the basic remuneration paid for performing the duties of Member of the Supervisory Board, taking into account the eligible payments for the period of their term of office in the relevant financial year.
- 3. The members of the Supervisory Board and the members of a Supervisory Board Committee shall receive basic remuneration and additional payments for performing their duties in the form of proportional monthly fees to which they are entitled as long as they perform their duties. The monthly fee shall amount to one-twelfth of the abovementioned annual payments.
- 4. Limits on the amount of total payments of attendance fees or additional payments to the members of the Supervisory Board shall in no way affect their statutory responsibilities and their duty to participate actively in all meetings of the Supervisory Board and the Committees of which they are members.
- 5. The members of the Supervisory Board shall be entitled to receive a refund of travel and accommodation costs in connection with their work for the Supervisor Board. The

amounts refunded shall be defined in accordance with the regulations governing the reimbursement of costs in connection with work and other income not included in the tax base (allowances for travel and overnight stays during business trips). The amount to which a member of the Supervisory Board is entitled in accordance with the above-mentioned regulations shall be calculated as a gross amount in such a way that the net amount represents the actual travel expenses refunded. Mileage expenses shall be calculated using the table of distances between places, posted on the website of AMZS, the national automobile association. Accommodation costs will be refunded only if the distance of a Supervisory Board member's and/or a Supervisory Board Committee member's permanent or temporary residence is at least 100 kilometres away from the location of the Board's or Committee's work, provided it is not possible for the member to return home owing to the lack of suitable scheduled public means of transport, or for other objective reasons.

As from the date of adopting this Resolution, the resolution on the amounts of attendance fees, adopted at the General Meeting of 7 April 2009, and the resolution on monthly payments for the performance of duties, adopted at the General Meeting of 19 May 2011, shall cease to apply.

Business plan for 2019

The Petrol Group has set ambitious goals for 2019. To achieve them, it will pay particular attention to the optimisation of operational and supporting business processes in 2019.

At the Petrol Group, we realise that despite careful preparation, informed business decisions, quick response to changes and an efficient risk management system external factors may arise in the business environment which are beyond our direct control and may pose a risk or a threat when it comes to meeting our targets. In 2019 these factors include:

- sales in the EU market, the extremely volatility of which might keep us from reaching our sales targets,
- the impact of the Act Regulating the Construction, Operation and Management of the Second Track of the Divača-Koper Railway Line, which foresees two new duties in order to finance the construction: a charge on transshipment in the freight port of Koper to be paid by the transshipment operator and an additional charge to the toll paid by the tollpaying entities, which would mean higher costs for the Petrol Group,
- proposal amending the Minimum Wage Act, which redefines the minimum wage by excluding allowances (including the length of service allowance), the job performance bonus and the business performance bonus, which might bring up labour costs.

The Petrol Group's main business targets for 2019:

- Sales revenue of EUR 5.6 billion
- Adjusted gross profit of EUR 475 million
- EBITDA of EUR 186.4 million
- Net profit of EUR 96.7 million
- Net debt to equity ratio of 0.4
- Net debt to EBITDA ratio of 1.8 (or 2.1 if IFRS 16 is taken into account)
- Financial leverage ratio of 29 percent

- 3.3 million tons of petroleum products sold
- Revenue from merchandise sales and related services of EUR 609.1 million a figure in accordance with IAS 18 which is no longer in effect (or EUR 481.6 million if IFRS 15 is taken into account)
- Retail network consisting of 515 service stations
- Investments in fixed assets of EUR 101 million

Considering its six-month results, the Petrol Group is successfully delivering on its 2019 targets.

As from 1 March and as laid down in the Act Regulating the Construction, Operation and Management of the Second Track of the Divača-Koper Railway Line, the charge on transshipment in the freight port of Koper is now levied and paid by transshipment operators. In addition, an additional charge to the toll paid by toll-paying entities is levied from the beginning of 2019, which means higher costs for the Petrol Group.

Events after the end of the accounting period

There were no events after the reporting date that would significantly affect the disclosed operations in the first six months of 2019.

Notes to the financial statements

Reporting entity

Petrol d.d., Ljubljana (hereinafter the "Company") is a company domiciled in Slovenia. Its registered office is at Dunajska cesta 50, 1527 Ljubljana. Below we present consolidated financial statements of the Group for the period ended 30 June 2019 and separate financial statements of the company Petrol d.d., Ljubljana for the period ended 30 June 2019. The consolidated financial statements comprise the Company and its subsidiaries as well as the Group's interests in associates and jointly controlled entities (together referred to as the "Group"). A more detailed overview of the Group's structure is presented in the chapter *Organisational structure of the Petrol Group*.

Basis of preparation

a. Statement of compliance

The Company's management approved the Company's financial statements and the Group's consolidated financial statements on 21 August 2019.

The financial statements of Petrol d.d., Ljubljana and consolidated financial statements of the Petrol Group have been prepared in accordance with IAS 34 – Interim financial reporting and should be read in conjunction with the Group's annual financial statements as at 31 December 2018.

The financial statements for the period from January – June 2019 are prepared based on the same accounting policies used for the preparation of financial statements for the year ended 31 December 2018, considering the implementation of the new standard IFRS 16.

b. Basis of measurement

The Group's and the Company's financial statements have been prepared on the historical cost basis except for the financial instruments that are carried at fair value or amortised cost.

c. Functional and presentation currency

These financial statements are presented in euros (EUR) without cents, the euro also being the Company's functional currency. Due to rounding, some immaterial differences may arise as concerns the sums presented in tables.

d. Use of estimates and judgements

The preparation of the financial statements requires management to make estimates and judgements based on the assumptions used and reviewed that affect the reported amounts of assets, liabilities, revenue and expenses. How the estimates are produced and the related assumptions and uncertainties is disclosed in the notes to individual items.

The estimates, judgements and assumptions are reviewed on a regular basis. Because estimates are subject to subjective judgments and a degree of uncertainty, actual results might differ from the estimates. Changes in accounting estimates, judgements and assumptions are recognised in the period in which the estimates are changed if a change affects that period only. If the change affects future periods, they are recognised in the period of the change and in any future periods.

Estimates and assumptions are mainly used in the following judgements:

- determining the amount of revenue and the timing of satisfaction of performance obligations,
- estimating the lives of depreciable assets,
- assets impairment testing,
- estimating of the fair value of assets,
- estimating of the influence in jointly controlled entities,
- estimate of provisions for litigation,
- estimate of provisions for employee post-employment and other long-term benefits,
- assessing the possibility of using deferred tax assets.

e. Changes in accounting policies

IFRS 16 - Leases

In 2019 the Group supplemented the applicable accounting policies and the treatment of events, together with their presentation in the financial statements, to align them with the requirements of IFRS 16, entered into force on 1 January 2019.

IFRS 16 replaces IAS 17 – Leases and requires lessees to account for all leases under a single on-balance sheet model in a similar way to finance leases. In the statement of financial position of the lessee leased assets are disclosed within fixed assets or as right to use of leased assets in connection with the lease liabilities. Value of the right of use of leased assets transfers through depreciation to expenses, interest expenses from leases increased financial expenses of the period. The standard includes two recognition exemptions for lessees – leases of 'low-value' assets and short-term leases. Lessor accounting is substantially unchanged from accounting under IAS 17.

The Group reviewed and analysed its lease contracts for which the lease terms exceed one year. The Group used the value of the lease and the length of the lease term to assess the value of the right-to-use of leased assets and lease liabilities and recognised them in the statements of financial position as at 1 January 2019. The value of the right-to-use assets and liabilities to make lease payments are assessed by discounting future cash flows over the lease term. Cash flows are discounted at the interest rates achieved by Group companies in financing long-term leases. The depreciation charge is calculated using depreciation rates estimated by taking into account the remaining term of the lease.

The effects of the adoption of IFRS 16 on the statement of financial position of the company Petrol d.d., Ljubljana and the Petrol Group as ta 1 January 2019

IFRS 15 – Revenue from contracts with customers

In 2018 the Group implemented IFRS 15 – Revenue from contracts with customers. Because of the impact of IFRS 15 – Revenue from contracts with customers the Group decreased the amount of revenue from the sale of goods and the cost of goods sold for the period of 1 January to 30 June 2018 as reported in the Report on the operations of the Petrol Group and the company Petrol d.d., Ljubljana in the first three months of 2018 on 25 August 2018 for 60,263,351 EUR.

The effects of the adoption of IFRS 15 on comparative financial data reported for the period of 1 January to 30 June 2018

	The Petro	l Group	Petrol	d.d.
(in EUR)	Amended	Published	Amended	Published
Sales revenue	2,376,136,587	2,436,399,938	1,851,827,581	1,912,090,932

Notes to individual items in the financial statements

1. Segment reporting

In view of the fact that the financial report consists of the financial statements and accompanying notes of both the Group and the Company, only the Group's operating segments are disclosed.

An operating segment is a component of the Group that engages in business activities from which it earns revenues and incurs expenses that relate to transactions with any of the Group's other components. The operating results of operating segments are reviewed regularly by the management to make decisions about resources to be allocated to a segment and assess the Group's performance.

The management monitors information on two levels: on the micro level, in which case individual units are monitored, and on the macro level, where information is monitored only in terms of certain key information that can be used to make comparisons with similar companies in Europe. Given the substantial amount of information and their sensitivity on the micro level, the Group only discloses macro-level information in its annual report.

The Group thus uses the following segments in the preparation and presentation of the financial statements:

- sales.
- energy and environmental services and production.

Sales consist of:

- sales of petroleum products,
- sales of merchandise and services,
- sales of liquefied petroleum gas (LPG),
- sales of and trading in electricity and natural gas.
- mobility.

Energy and environmental services and production consist of:

- energy and environmental solutions for the public and the commercial sector.
- energy solutions and industry and apartment buildings,
- distribution of natural gas.
- production of electricity from renewable sources.

The Group's operating segments in the period 1 January - 30 June 2018:

(in EUR)	Sales	Energy and Environmental Solutions and Production	Total	Statement of profit or loss/ Statement of financial position
Sales revenue	2,590,220,935	33,102,125	2,623,323,060	
Revenue from subsidiaries	(247,081,599)	(104,874)	(247, 186, 473)

9. Earnings per share

	The Petrol	Group	Petrol (d.d.
(in EUR)	30 June 2019	30 June 2018	30 June 2019	30 June 2018
Net profit (in EUR)	40,660,982	39,126,996	19,106,738	33,951,528
Number of shares issued	2,086,301	2,086,301	2,086,301	2,086,301
Number of own shares at the beginning of the period	30,723	30,723	24,703	24,703
Number of own shares at the end of the period	30,723	30,723	24,703	24,703
Weighted average number of ordinary shares issued	2,055,578	2,055,578	2,061,598	2,061,598
Diluted average number of ordinary shares	2,055,578	2,055,578	2,061,598	2,061,598
Basic and diluted earnings per share (EUR/share)	19.78	19.03	9.27	16.47

Basic earnings per share are calculated by dividing the owners' net profit by the weighted average number of ordinary shares, excluding ordinary shares owned by the Company. The Group and the Company have no potential dilutive ordinary shares, so the basic and diluted earnings per share are identical.

25. Financial instruments and risks

This chapter presents disclosures about financial instruments and risks. Risk management is explained in the interim report, in the chapter *Risk management*.

Credit risk

The Group/Company continued to actively monitor the balances of trade receivables and to apply strict terms on which sales on open account are approved, requiring an adequate range of high-quality collaterals.

Maximum exposure to credit risk represents the carrying amount of financial assets which was the following as at 30 June 2019:

	The Petrol Group		Petrol d.d.		
		31 December		31 December	
(in EUR)	30 June 2019	2018	30 June 2019	2018	
Financial assets at fair value through other comprehensive income	9,168,566	9,168,566	1,374,993	1,374,993

Liquidity risk

The Group/Company successfully manages liquidity risks according to Standard & Poor's guidelines.

The Group/Company manages liquidity risks through:

- deleveraging (measured as the net debt to EBITDA ratio) as laid down in the strategy and business plan;
- ensuring adequate structural liquidity in accordance with S&P methodology;
- standardised and centralised treasury management at Group level;
- annual planning of funds by the Petrol Group as well as monthly and daily planning;
- unified approach to banks in Slovenia and abroad;
- computer-assisted system for the management of cash flows of the parent company and all its subsidiaries:
- centralised collection of available cash through cash pooling.

Nearly half of the Group's/Company's total cash inflow is generated through its retail network in which cash and payment cards are used as the means of payment. This ensures regular daily inflows and mitigates liquidity risks.

In addition, the Group/Company has credit lines at its disposal both in Slovenia and abroad, the size of which enables the Group to meet all its due liabilities at any given moment.

In the first six months of 2019 the Group/Company again focused strongly on the planning of cash flows. Successful planning of cash flows enabled it to anticipate any liquidity surpluses or shortages in time and manage them optimally.

The majority of financial liabilities arising from long-term and short-term loans are held by the parent company, which also generates the majority of revenue.

The Group's liabilities as at 31 December 2018 by maturity:

	Contractual cash flows					
(in EUR)	Carrying amount of liabilities	Liability	0 to 6 months	6 to 12 months	1 to 5 years	More than 5 years

Foreign exchange risk

As far as foreign exchange risks are concerned, the Group/Company is mostly exposed to the risk of changes in the EUR/USD exchange rate. Petroleum products are generally purchased in US dollars and sold in local currencies. For government-regulated fuels, hedging is performed in accordance with the Group's foreign exchange risk management policies prepared on the basis of the Decree Setting Prices for certain Petroleum Products, whereas for fuels with market-determined prices, internal Rules on the Pricing of Mineral Fuels are used. Foreign exchange hedging is used to hedge against the exposure to changes in the EUR/USD exchange rate. The EUR/USD exchange rate is thus fixed at the rate recognised under the Decree on Setting Prices for Certain Petroleum Products and the internal rules, and the margin is secured. The hedging instruments used in this case are forward contracts entered into with banks.

Given that forward contracts for hedging against foreign exchange risks are entered into with first-class Slovene banks, the Group/Company considers the counterparty default risk as minimal.

The Group is exposed to foreign exchange risks also due to its presence in South-eastern Europe. Considering the low volatility of local currency exchange rates in South-eastern markets and the relatively low exposure, the Group/Company believes it is not exposed to significant risks in this area. To control these risks, we rely on natural hedging to the largest possible extent.

In the first six months of 2019, the Group/Company was also exposed to certain other currencies (RON, HUF), which were hedged using derivative financial instruments. The Group/Company regularly monitors its open currency position and sensitivity based on the VaR method for all currencies to which it is exposed.

Exposure to the exchange rates on other markets where the Group/Company is present with its companies is either smaller or their rates against the euro are significantly less volatile. We estimate that the change in the exchange rate would not have a significant impact on the operating profit.

Price and volumetric risk

The Group/Company is exposed to price and volumetric risks deriving from energy commodities. The Group/Company manages price and volumetric risks primarily by aligning purchases and sales of energy commodities in terms of quantities as well as purchase and sales conditions, thus securing its margin. Potential residual mismatches are hedged with derivative financial instruments. Depending on the business model for each energy commodity, appropriate limit systems are in place that limit exposure to price and volumetric risks.

The Group/Company hedges energy commodity prices primarily by using commodity swaps (variable to fixed price swap). Partners in this area include global financial institutions and banks or suppliers of goods. The Group/Company considers the counterparty default risk as minimal.

Interest rate risk

The source of interest rate risks are loans with a floating interest rate that are mostly Euribor based.

In the first six months of 2019, the Group/Company continued to monitor the limit corresponding to changes in net interest expense.

The exposure to interest rate risks is hedged using the following instruments:

- partly through ongoing operations, the Group's/Company's interest rate on operating receivables being Euribor-based,
- interest rate swaps and
- funding with a fixed interest rate.

The Group/Company uses hedge accounting on interest rate swaps. Hedged items and hedging instruments represent an effective hedging relationship, which is why interest rate risk hedging outcomes are recognised directly in equity. In the case of interest rate swaps where an effective hedging relationship does not exist, the effect of interest rate swaps is recognised in the statement of profit or loss.

Capital Adequacy Management

The main purpose of capital adequacy management is to ensure the best possible financial stability, solvency and maximum shareholder value. The Group/Company achieves this also through stable dividend pay-out policy.

Testifying to our financial stability are the »BBB-« credit rating received from S&P at the end of June 2014 and the successful international issuance of eurobonds worth a total of EUR 265 million. On 11 April 2018, Standard & Poor's Ratings Services reaffirmed the »BBB-« long-term credit rating and the »A-3« short-term credit rating of Petrol d.d., Ljubljana, also reaffirming the »stable« credit rating outlook.

In the first six months of 2019 the Petrol Group continued to pursue its strategic orientation to drive down financial debt to levels outlined in the strategic plan.

Total	159,761,129	173,652,338	73,144,716	82,985,173	
Other guarantees	7,272,686	14,134,206	7,272,686	14,134,206	
Bills of exchange issued as security	14,400,103	5,453,593	14,400,103	5,453,593	
Total contingent liabilities for guarantees issued	181,433,918	193,240,137	94,817,505	102,572,972	

The value of a guarantee issued represents the maximum value of the guarantee issued, whereas the guarantee amount used represents a value corresponding to a company's liability for which the guarantee has been issued.

Contingent liabilities for lawsuits

The total value of lawsuits against the Company as defendant and debtor totals EUR 33,496,235. The Company's management estimates that there is a possibility that some of these lawsuits will be lost. As a result, the Company set aside long-term provisions, which stood at EUR 10.307,056 as at 30 June 2019.

The total value of lawsuits against the Group as defendant and debtor totals EUR 33,730,929. The Group's management estimates that there is a possibility that some of these lawsuits will be lost. As a result, the Group set aside long-term provisions, which stood at EUR 10.531,721 as at 30 June 2019.

28. Events after the reporting date

There were no events after the reporting date that would significantly affect the financial statements for the first six months of year 2019.
